Professional Summary

University of Illinois CS graduate with 3+ years of Software Engineering experience delivering backend features in C#/.NET for enterprise government case management platforms using Azure. Full-stack comfortable with TypeScript, React & Angular, with a track record of technical leadership, agile delivery via Jira/Azure DevOps, and federal compliance. Leverages AI-assisted development tools like Cursor, GitHub Copilot, and Claude.

Professional Experience

Software Engineer • 3+ years of experience • RedMane Technology, LLC

Jun 2023-Present

Technologies: SQL, C#/.NET, LINQ, Python, Java, Azure DevOps, Git, Batch Scripting, TypeScript, Cursor, JIRA

- Selected for a high-visibility AI productivity initiative driving a 150% increase in defect resolution output, leveraging Cursor and GitHub Copilot while sharing AI-assisted practices to elevate team-wide productivity
- Owned feature development, unit testing, bug resolution, and issue logging for New Mexico's child welfare case management platform, maintaining a C#/.NET codebase under a hybrid Agile-Waterfall workflow
- Identified a recurring, time-pressured task and independently built a Python automation tool with a lightweight GUI (Windows batch scripting) outside of assigned work, saving hours daily
- Refined form auto-population microservice workflows using AI-assisted tooling (Cursor Skills), improving development consistency and delivery speed, resulting in a 3x increase in defect resolution rate for forms
- Earned ownership of the highest-priority form set, released first to clients, along with task oversight for junior developers
- Spearheaded development of views and stored procedures synthesizing SQL, Python, and Batch scripting to sync data across SQL databases, resulting in efficient, automated daily synchronization of 50+ tables
- Proactively escalated required Azure DevOps CI/CD pipeline updates during migration to a new development environment, and coordinated with the product team to establish a new ORM CI/CD pipeline
- Took ownership of an internal ORM tool, driving discussion, code reviews and cross-project adoption
- Reviewed Feature Design Documents (FDDs), identifying and surfacing 100+ discrepancies and unimplemented requirements to business analysts, proactively preventing downstream blockers and misaligned software implementations
- Led meetings and demos across developer and business analyst teams to define batch process requirements, then implemented, tested, and documented backend processes for the testing team
- Joined the South Dakota Office of Licensing and Accreditation (SDOLA) project in its final UAT phase, diagnosing and resolving defects under deadline pressure to contribute to a successful project delivery
- Designed and built a test data generation tool at a company hackathon, leveraging the Mockaroo REST API alongside internal RESTful APIs and projects to automate realistic test data creation
- Became the peer go-to despite being the newest on a frontend Playwright/TypeScript regression testing project, building end-to-end test suites; lead modeled team workflow and communication after mine

Education

University of Illinois at Urbana-Champaign • Champaign, IL

Aug 2020-Dec 2022

- Bachelor of Science in Computer Science; [GPA: 3.55 / 4.00](#)
- Software Developer Course Assistant leading weekly code reviews for C++/Java student projects, emphasizing modular design, test-driven development, and regression testing / unit testing
- *Course Highlights:* Systems Programming; Probability and Statistics for Computer Science; Programming Languages & Compilers; Computer Architecture; Data Structures, Interactive Computer Graphics, Intro to Algorithms & Models of Computation, Text Information Systems, Artificial Intelligence, Web Programming

William Rainey Harper College • Palatine, IL • Cum Laude

Aug 2018-May 2020

- Associate of Science in Engineering Science; [GPA: 3.65 / 4.00](#)
- Accolades: Dean's List All Semesters, Honors Program Graduate, Science Olympiad Scoring Aid
- Women in Science and Engineering Outreach Volunteer

Skills

- **Technologies:** C#/.NET, SQL, Python, TypeScript, C++, C, Java, Git, Linux, Bash, HTML, CSS, REST APIs, Postman, Playwright, SCSS, Docker, Kubernetes, GitHub Actions, CI/CD, PostgreSQL, AWS, ORM, Redis
- **Cloud & AI Tools:** Google Cloud Platform (GCP), MongoDB Atlas, Microsoft Azure, Azure DevOps (ADO), Supabase, Vercel, JIRA, GitHub Copilot, Cursor, Claude Code
- **Libraries/Frameworks:** Flask, React, Next.js, Angular, Node.js, Vite, LINQ, NumPy, Pandas, Angular CDK
- **Fundamentals:** ORM/DAL Patterns, Database Migration, REST API Integration, Machine Learning, Object-Oriented Programming, Test-Driven Development, Agile/Waterfall Methodologies, Unit Testing, Regression Testing, Latency Optimization, Technical Documentation, Software Development Life Cycle (SDLC)
- **Hobbies:** Rock Climbing, Guitar, Chess, Disc Golf, Singing, Video Games, Top 500 Strategy Game Player
